

### **Sync Your Data**

ownCloud is file syncing and sharing technology with a mission: put your data back under your control.

### **Solve hard problems**

Seamless syncing and sharing between multiple devices is a hard problem. With C++, PHP, HTML5 and CSS we build a solution that has to be easy to use, scale perfectly, always work - and perform well.  
Have ideas on how? Join us!

### **Share your code**

Getting code in ownCloud and to our millions of users is easy. All coding happens in github and our modular code base makes it possible to focus on a single piece of functionality.

~~Consume~~

**CREATE**

**With ownCloud you  
can sync & share your files,  
calendar, contacts and more.**

**Access your data from all your  
devices, on an open platform  
you can extend and modify.**
